Jesús Martín

Front-end Developer

Profile

I'm Jesús Martín Zorrilla, I'm studying Computer Engineering. I've studied web developer since 2021. I programme almost every day because it's one of my favorite hobbies. I propose myself new objectives every day in order to continue learning and trying to use new technologies.

Experiences

february 2022 - Currently | Secrets-On, Madrid

React Front-end Developer

Responsabilities:

- Cooperate with the development of the website in wordpress.
- Cooperate with the development of the plataform.

Recommendations that I've contributed:

- Work with a methodology agile.
- Use SASS and Suit CSS together.
- A folder structure more sustainable.

Stack: Wordpress, SASS, Suit CSS, Javascript, React, Docker.

Distinguished project

february 2022 - june 2022 | Final Degree Project

Web application for restaurant business

My objeotive is speed up this sector so I've created a web application for that the clients will be able to reserve table, order and pay without contact with the waiter.

Stack: Tailwind, Javascript, React, Nextjs, PHP, MySQL, Laravel.
